## Caution: Freezing Tellfresh® Microsafe® storers

Tellfresh® Microsafe® storers are very useful for storing foods in the freezer but please be careful handling them when they are frozen. Freezing causes a storer to become temporarily stiff, making it difficult to remove the lid.

After taking a Tellfresh® Microsafe® storer from the freezer, we recommend that you allow it to rest at room temperature for a few minutes, or run warm water over it for a few seconds. The lid will then be easy to remove.

No BPA

No anti-bacterial chemicals added

## Care guidelines

Tellfresh® Microsafe® storers are designed for quick microwave cooking and reheating of small to medium quantities of food. Avoid using in the microwave on high for extended periods. We recommend you stir the contents occasionally if the recipe permits.

Do not use the storers in conventional ovens or on hot plates.

Before use, remove the labels and wash the storer by hand or in the dishwasher. Do not use abrasive materials when hand washing.

Please note that microwaving foods high in sugar, oil, fat, tomatoes, carrots, broccoli or curries may mark or stain the storer but will not affect its usability. If staining occurs, applying a paste of baking soda and water and then rinsing thoroughly can help to reduce discoloration.

The steam/air release vent on the storer can be easily removed from the lid for cleaning.
